

## LEONI iEVC

### illuminated charging cable with status-indicating light function

The LEONI iEVC (illuminated Electrical Vehicle Charging Cable), which has advanced features, provides a visual monitoring of the vehicle's charging process by changing the colour of the cable jacket.

#### Advantages and characteristics

- Attractive design
- Continuous dimmability
- Displays the charge status of the electric car or plug-in hybrid
- Optical signals to display additional information, such as interference-free connection or malfunction
- Light function of the cable prevents the risk of stumbling in dark places
- Consistent illumination of the cable across its entire length
- Illumination in any colour
- Flexibility and mechanical strength
- Can be used universally for home and public charging regardless of the vehicle and country
