

LEONI Dacar®

Focused on communication.

Multi-core data transmission cables and coaxial cables.

Benefits / Properties

- flexible
- best coupling resistance and shield attenuation properties
- stable impedance
- best environmental properties / recyclability
- solid / foam dielectrics
- standard temperature range for data and coaxial cables
-40 °C up to +105 °C,
enhanced temperature range
-65 °C up to +205 °C
- in versions for statistical and dynamical applications

Applications

- antenna applications
- telematic applications
- multimedia

The LEONI Dacar product range is divided into symmetrical and unsymmetrical data transmission cables.

We differentiate as follows between information and communication:

- Information as an unidirectional data flow where data is processed e.g. in the vehicle.
- Communication is a bi-directional flow of data, as for example a telephone conversation between two or more people.
