

LEONI exFC®

Maximum performance – minimum space.

Extruded flat cables for car wiring.

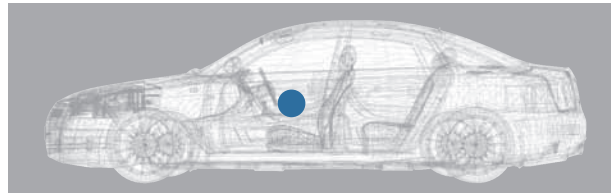

Benefits/Properties

- fully automated assembly possible
- low space requirement
- variable insulation thickness
- separation grooves
- variable pitch
- coloring of insulation

Applications

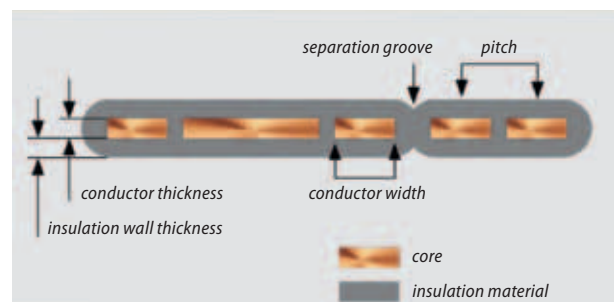

- automotive wiring with limited space
- clockspring
- slides

The automotive industry demands reduction in weight and size in all sectors. Following this trend, LEONI developed extruded flat conductors.

Characteristics

- single rolled flat copper wires
- flame-retardant materials
- recyclable products
- resistance to hydrolysis
- insulation materials PVC, PUR, TPE
- conductor surface in bare, tinned or silver-plated version
