

# Consulting

Consulting for electrical and electronic systems

**Benefit from our extensive and diversified project and manufacturing competence. We can advise you and help you achieve your goals.**

## Our services

- Network analysis
- Feasibility studies for cable system projects
- Investment calculations for cable systems
- Status analysis of cable systems
- Thermography of cable systems
- Analysis of short-circuit behaviour of cable systems
- Probabilistic Safety Assessments (PSA)
- Logistics concepts for roads, excavation, terrain, water and air
- Installation and routing of cable systems
- Safety concepts
- Real-time documentation with CAE
- Consultation in the implementation of agreed energy efficiency goals
- Design consultation for cable supporting systems
- Design consultation for tube installation
- Design consultation for cable bulkhead and seals
- Design consultation for electrical infrastructure and lighting
- Communications wiring
- Cable removal
- Controlled removal of sensitive cable systems
- Controlled removal of sensitive electrical and electronic systems
- Delivery and operation of special vehicles for cable installation
- MV cable testing
- LV cable testing
- LV electrical testing
