

Scope of Supply

	Design	Install	Provide	Service
Receive Naked Robot				
■ Check Robot Configurations & Options				•
■ Flexibility to Change Configuration per Customer Request			•	•
Dresspack	•	•	•	•
Robot Controller				
■ Safety Interface	•	•	•	•
Power and Media Supply				
■ I/O Cables	•	•	•	•
■ Communication Cables	•	•	•	•
Programming Services				
■ PLC		•		•
■ Core and Customization Software		•		•
■ Communication Mapping		•		•
Installation and set up Services				
■ Optimize Dress Pack			•	•
■ Mount EOAT		•		
■ Tune Gun		•		•
■ Tool Payload		•		
■ Calibrate Gun Pressure		•		•
Application Power				
■ Signal & Communication Cables	•	•	•	•
■ Power Cables	•	•	•	•
■ Mount Controller		•	•	•
■ Special Hose or Tube	•	•	•	•
Media Panels				
■ Air	•	•	•	•
■ Air and Water	•	•	•	•
Additional Products and Services				
■ Robot Programmers			•	•
■ Vision Integration	•	•	•	•
■ Robot and PLC Training	•		•	•

Business Unit Robotic Solutions

LEONI Engineering Products & Services, Inc.

Main office:

100 Kay Industrial Drive
 Lake Orion, MI 48359 USA
 +1 (248) 484-5500

Southern regional office:

5211 Linbar Drive – Suite 505
 Nashville, TN 37211 USA
 +1 (615) 540-1533

Function Packages Industrial Solutions

The Quality Connection

LEONI

Scan to get more information on LEONI Function Packages.

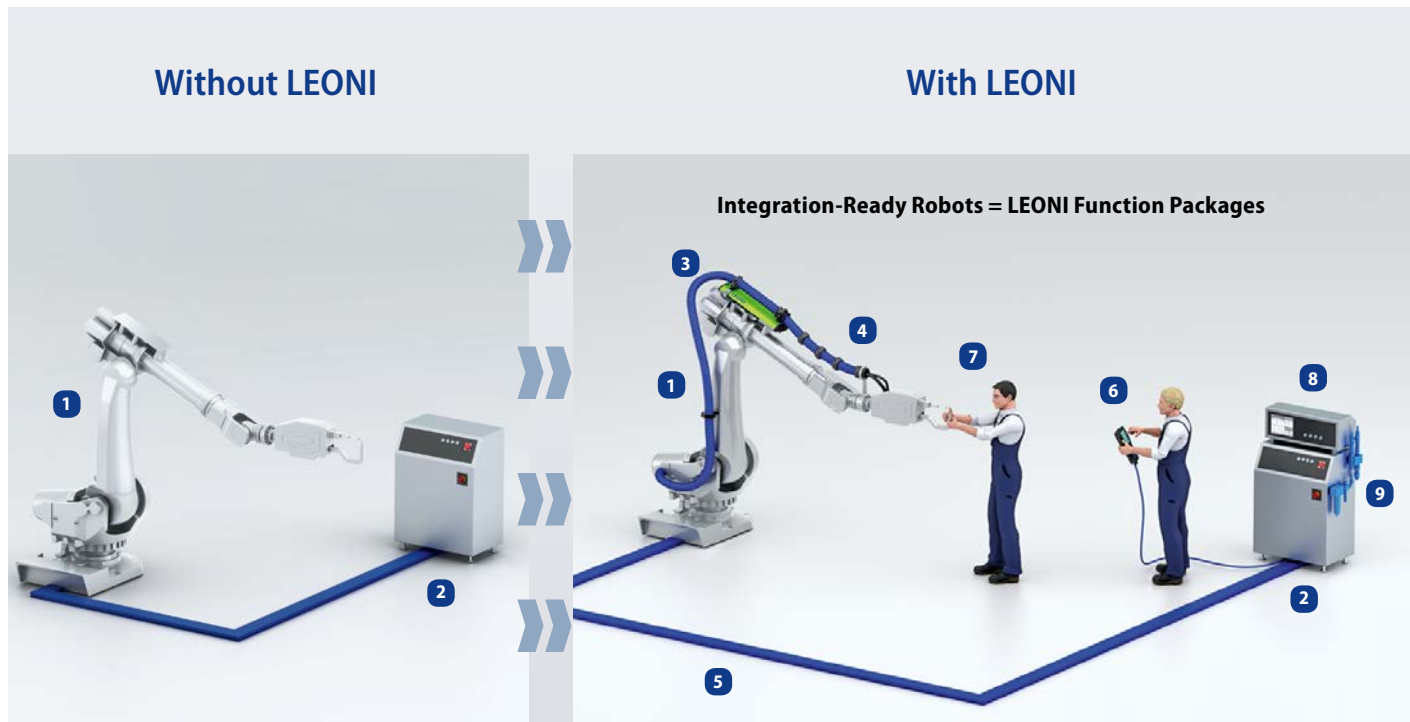

Function Packages = Integration-Ready Robots

Our Integration-Ready Robots begin with a naked robot on which we install the dress package, end-of-arm tooling, weld controller, dense pack, electrical junction box etc. We optimize the dress pack, configure, setup and test the gun, software and Tool Center Point.

We have the capability to provide you with complete Function Packages, e.g. for spot welding, inert gas welding, measuring and handling. Should you already have corresponding robots or other hardware components, we shall incorporate these in the work we offer.

We also offer services like programming and training of your customer's staff.

Typical turnaround for line builders: 24 hours up

- 1 Robot
- 2 Robot controller

- 1 Robot
- 2 Robot controller
- 3 Robot dress pack
- 4 Robot end of arm tooling
- 5 Power and media supply

- 6 Programming service
- 7 Installation and setup service
- 8 PLC/HMI controller
- 9 Media panel
