Standard packing instructions of export drums

Packing

Usually wooden drums are used for export. The size is dependent of cable dimensions, length and weight.

All wooden export drums used by LEONI Kerpen GmbH are treated according to ISPM 15 regulation.

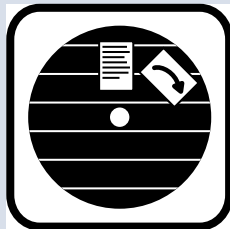

If a wooden drum is packed properly as described in this document LEONI Kerpen GmbH gives warranty for packing for a period of up to 18 months after delivery. It is understood that the packed drum is handled and stored properly as described in the Guidelines for Drum Handling.

The common packing consists of:

- Cable ends are sealed with PVC caps. The cable ends are fixed.
- Lagging with wooden planks. The planks are aligned with the drum flanges and fixed by nails.
- A steel tape is applied over the lagging planks around the drum and fixed with nails.
- The drum marking (Shipping Marks) is written on a plastic tag made of PVC applied on both flanges (if required) with cable information and project details according to customer specification.
- A stamp demonstrating compliance with ISPM 15 regulation (treatment of wooden export packing material) is applied on both flanges.
- Labels to indicate the allowed roll direction ("Roll This Way") are applied on both flanges.

Drums shall be marked clearly.

The allowed roll direction shall be indicated

Additional information on the drums

- ✓ A drum tag with LEONI Kerpen GmbH drum number.
- ✓ A plastic envelope, watertight, with a copy of the packing list (only on one flange).
- ✓ Tag(s) with LEONI Kerpen GmbH information for internal use.
- ✓ Additional information according to customer requirements may be applied, too.
- ✓ Stamp for ISPM 15 regulation.
